

Arco Pure Protection Cream

PROPERTIES

Arco Pure Protection Cream protects against aqueous and non-aqueous substances.

- Examples of aqueous and non-aqueous substances: cooling lubricants, aqueous solutions, oils, greases, tar, bitumen, paints, soot, pigments, cement, lime, various adhesives, PU foams, sealing materials, etc.
- Is a non-greasing skin protectant that is easily spread on the skin and is absorbed quickly.
- Protects the skin especially against changing skin stress caused by different substances. Only one skin protectant is needed.
- Reduces skin contact with harmful noxious substances and deeper penetration of dirt into the skin. This reduces the general skin stress and facilitates subsequent skin cleansing.
- Is HACCP-rated and can therefore be used within the framework of an HACCP concept in the food industry.
- Is suitable for use for people with sensitive skin.

COMPOSITION

Arco Pure Protection Cream consists of selected, high-quality raw materials and a special protective agent.

- The general protection against aqueous and non-aqueous substances is mainly achieved by a special polymer-based film-forming system.
- In addition to this special protective system, it contains caring substances and natural α -bisabolol, as an effective chamomile ingredient, which has anti-inflammatory properties.
- Is pH-neutral to skin.
- Is silicon-free.
- Is unscented.
- Was rated “very good” in a dermatological-allergological test on subjects with sensitive skin.
- Has proven itself in practice based on many years of experience.

APPLICATION

Make sure your skin is clean and dry and then carefully rub in Arco Pure Protection Cream before beginning work or after work breaks (particularly into the bed of your nails).

Arco Pure Protection Cream is suitable for all-over body use.

PRODUCT DESCRIPTION

Arco Pure Protection Cream is a white oil-in-water lotion, unscented.

pH-value: 4.1 – 5.8

Density: approx. 1 g / cm³ (20 °C)

LEGAL REGULATIONS

Arco Pure Protection Cream is subject to the EU Cosmetics Regulation and the UK Cosmetics Regulation.

All our cosmetic products are manufactured according to GMP (Good Manufacturing Practice) and undergo microbial quality control.

STORAGE INFORMATION

Arco Pure Protection Cream can be stored in closed original containers at room temperature for at least 24 months.

SKIN CARE TIPS

Depending on the type of soiling, a suitable skin cleansing product should be applied (e.g. Arco Med/Heavy Duty Hand Wash for medium to heavy soiling).

After work, the skin should be regularly rubbed with a suitable skin care product (e.g. Arco After Work Moisturiser Lotion, the active substance-rich Skin Care Lotion) to regenerate the skin.

FURTHER INFORMATION

Group leaflets, specifications and dermatological reports are available on request. Certificate: The product passed dermatological-allergological tests carried out under medical supervision on sensitive skin with the rating "very good".

DISPENSER SYSTEMS

- Arco One White / Arco One Black Dispenser plastic dispenser for 1 l soft bottles, with viewing.
- Arco SF2 Plastic - plastic dispenser for 1 l + 2 l soft bottles, white or silver lacquered cap.
