

3M Black Economy Floor Pad

For scrubbing or stripping operations

Technical data sheet

TD163. Date: November 2009
Supersedes: new issue Page 1 / 1

Description:

The 3M Black Economy Floor Pad is made of synthetic fibres, in an open textured non-woven construction. Abrasive particles are dispersed throughout and bonded with resin. Each floor pad has a pre-cut centre hole.

Special Features:

- Aggressive mineral particles for removal of dirt and floor finishes.
- Wear resistant fibres.
- Open web construction to collect and trap soil from floors.

Where and When to Use:

RPM	150-400	400-1200
Strip	XX	
Scrub	X	
Spray / Daily		
Buff		

XX Designed for X suitable

Recommendation is to use the 3M Black Economy Floor Pad with stripping solutions and low speed machines for wet stripping of floors. It can also be used for heavy duty cleaning on hard surfaces such as concrete.

Directions for Use:

Stripping operation

1. Install a clean floor pad under the machine driving plate.
2. Apply stripping solution on the floor with a mop or with the tank of the machine.
3. Allow the chemical to react for 5-10 minutes.
4. Strip the floor with the machine and water in order to keep the floor wet during the process.
5. Pick up residues and rinse the stripped floor with clean water and a mop. Let the floor dry before recoating or re-opening to traffic.
6. Remove pad and wash it.

Maintenance of pad:

1. Remove pad from machine after each use
2. Rinse under tap water to remove residues. Put the pad into a plastic bag and close the bag in order to maintain the floor pad wet, if you cannot clean the floor pad immediately. Clean the pad at the earliest opportunity and do not let the dirt dry after the operation.
3. Hang up for drying. Let it dry.

Product Specifications:

The 3M Black Economy Floor Pad consists of polyester and nylon fibres, mineral particles and synthetic resin. They are not significantly affected by water,

detergents and cleaners normally used in floor maintenance.

Product Characteristics (typical values):

Colour: Black
Marking: None
Thickness: 25.0mm (typical)
Centre hole: Pre-cut at 85 mm
Fibre type: Polyester and Nylon

Packaging and labelling:

Packaging material made of 100% recycled material. Product name and size indicated on each case.

Disposal Information:

Discard into appropriate container, for incineration, if available.
Packaging material: recyclable

Origin:

Made in France, ISO 9002 certified plant.
