Undotted surface may have reduced performance

Tested in accordance with EN 388, EC type examinations were carried out by SGS United Kingdom Ltd., Weston-Super-Mare BS22 6WA United Kingdom.  
(Notified Body No. 0120)

### CLEANING / MAINTENANCE

Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. Gloves should not be left in contaminated condition if reuse is intended in which case gloves should be cleaned as far as possible.

### STORAGE

Gloves should be ideally stored in dry conditions in original package.

### OBSOLESCENCE

When stored as recommended will not suffer change in mechanical properties for up to three years from the date of manufacture. Service life cannot be specified and depends on the application and responsibility of user to ascertain suitability of the glove for its intended use.

### GENERAL

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer.

### PLEASE NOTE

The results of the physical tests should help in glove selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the end user and not the manufacturer to determine glove suitability for the intended use.
