2.2.4.2

Packing and storing

The gloves are packed individually along with this leaflet. They are packed in cardboard cartons containing 120 pairs. The outer carton is suitable for transportation and storage. Store in a cool, dry place out of direct sunlight and away from excessive heat.

Obsolescence

Stored correctly, as recommended below, the gloves should not deteriorate.

Maintenance

Both new and old gloves should be inspected before wearing to ensure that no damage is present before use. Laundering these gloves is not recommended.

Innocuousness

Whilst every effort is made to ensure the innocuousness of these products, there are certain chemicals used, which may cause skin irritation to a small percentage of users. In the event of this occurring an alternative product should be supplied. Please contact Arco.

The information contained in this leaflet is intended to assist in the selection of PPE (Personal Protective Equipment). It is the responsibility of the user to determine and select the appropriate and suitable PPE.
