

PowerFlex®

80-658

Feel the power of extreme cut protection

Workers in glass, metal, waste and recycling industries require extreme protection from cuts – they need Ansell's new PowerFlex® 80-658 glove. In tests as per EN388, its triple-layer construction exceeds cut level 5 resistance.

Furthermore, the glove's long knitted cuff also offers extended forearm protection.

Finally, the $\frac{3}{4}$ dipped, liquid-repellent design shields the wearer from water-based contaminants.

The Ansell logo consists of the word "Ansell" in a bold, blue, sans-serif font. Below the text is a thick, curved green line that underlines the brand name.

Feel the power of extreme cut protection

Applications

- Glass industry: handling of glass sheets, sharp-edged objects
- Metal industry: handling of metal sheets, cutting of dry, painted or galvanised pieces
- Building & construction: handling heavy loads, metal edges
- Waste handling: recycling, sorting (glass, cans, metal pieces)

Extreme resistance to cuts, abrasions, splinters and burrs

- PowerFlex® 80-658 protects the wearer with a triple-layer construction that comprises steel, fibreglass and Kevlar®.
- The glove exceeds EN388 cut level 5.

Better forearm protection

- Extra-long cuff offers extended safety for the forearm.

Protects skin from water-based contaminants

- The PowerFlex® 80-658 glove is ¾ dipped and liquid repellent,

shielding the skin from unpleasant liquid solutions.

Good heat contact resistance

- EN407 level-2 rating means safe handling of warm objects.

Outstanding comfort and grip for all users

- Natural rubber latex crinkle finish provides a firm grip.
- Tough appearance helps users feel more secure.
- PowerFlex® 80-658 comes in a wide range of sizes: 6-11.

Cost efficient

- Long life makes the PowerFlex® 80-658 a highly cost-effective solution. Heather green colour helps mask dirt.
- Excellent washability, with no decrease in comfort or fading.
