

**SR 100 Upgrade**

# New update of SR 100

The SR 100 upgraded version have been tested and approved by INSPEC with excellent total inward leakage results for top-of-the-line respiratory protection.

There are some major improvements, and it is the exhalation valve covers that will be double moulded with excellent protection of the exhalation valve/membrane from splash backs when spray painting. The elastic in the straps for the single strap head harness and cradle head harness will be made of Lycra which is a highly elastic synthetic fibre instead of natural (latex) rubber.

The Lycra material in the head harnesses is chosen to reduce the risk of contact allergies and is more durable which gives an even longer life-time and reduces the environmental impact of the respirator.

The cradle head harness will have a drop-down function and enable the user to lower the mask from their face while keeping other safety equipment such as helmet, hearing protectors and glasses in place.

All sizes will be in dark blue and the size indication will be the colour of the head harness attachment and is also marked on the mask body:  
 Orange - S/M, Black - M/L, Blue - L/XL
