

RECOIL KNEEPADS

WITH OUR UNIQUE RECOIL360™ SUSPENSION SYSTEM

FLOOR LAYING

JOINERY & CARPENTRY

TILING

SCREEDING WORK

FLAT ROOFING

Founded in 2013, Recoil Kneepads is a game changing kneepad to the professional trades and construction industry. Often described as like 'kneeling on a cloud', this kneepad was designed by the daughter of a Carpenter, Gordon, suffering from severe knee pain and arthritis. Gordon had complained of pain and discomfort in his knees and had been unable to find suitable kneepads on the market. His daughter, a product designer, was inspired to develop a solution to aid her Dad at work and allow him to continue in the occupation he loves and has known all his life.

ACCESSORY RANGE (Available to Purchase Separately)

FLOOR COVERS

R20 STRAPS

REPLACEMENT FOAM

DRAWSTRING BAG

FEATURES

Patented Spring Loaded Impact System - The only kneepads in the world to use a coil spring pressure reduction system.

- Scientifically Proven to reduce pressure on the knees by 76%
- Kneepad pivots making it easier to move across a floor.

Ultra Soft & Secure Fit Straps - Soft, secure straps that won't dig in and don't chafe.

Removable Floor Covers - An accessory to your kneepads that ensures delicate surfaces remain protected and safe from debris that may be transferred from another surface. Available separately, and can be purchased as required.

Recoil Drawstring Bag - An accessory to your kneepads that allows for convenient storage and easy locating in the back of a van.

Replacement Straps & Foam Pads - Easy to remove strapping and foam pads that allow replacements to be purchased and attached easily.

CE EN14404 ACCREDITED PROTECTION FOR WORK IN
