arcoPro

arcoPro Category 3

ArcoPro FR Balaclava
Inherent workwear

The ArcoPro range of Flame Retardant clothing has been designed with Ultimate Protection in mind. This range of highly technical workwear meets the most demanding safety standards and as such carries our Category 3 seal of approval.

These garments are inherently flame retardant and anti-static which makes them ideal for use in hazardous working environments.

▶ **Garment details:**

- Reduced number of seams - makes the garments as comfortable as possible, important when selecting base layer garments which lie next to the skin

- Perforated areas for additional breathability in usual areas that generate heat, for example the back of the neck

- Lightweight stretchable fabric - helps to provide a great fit

- Technological fabric - helps to wick away sweat and regulate body temperature

▶ **Grey:**   18B2600
