

XR110 Diesel/Paraffin Fired Space Heater

Fuelled by paraffin or diesel, the powerful XR110 produces an impressive 29.3kW of heat, while the built in electric driven turbo fan distributes that heat quickly and evenly to raise the temperature of any room to the required level without fuss. A large fuel tank capacity of 32 litres provides a long run time of 11.4 and a half hours.

Mounted on durable wheels and fitted with an ergonomic handle and stand, the XR110 can be transported from area to area with ease and is suitable for both localised and full area heating.

- Heat output: 100,000 BTU/hr (29.3kW)
- Variable heat control with thermostat - heater cycles on/off as heat is required
- Fuel tank capacity: 32 litres – 11 hours continuous operation
- Wheels & handle for easy movement
- Stainless Steel combustion chamber
- High efficiency air & fuel filters. Automatic flame failure cut-out.
- 230V ~ 50hz 1ph- Dimensions (LWH): 905x413x700mm - Weight: 19.85Kg
