

Fully Plastic Fire Retardant Sackholder 42 L & 70 L

✓ 100% Plastic Construction

No metal parts whatsoever in the construction of the BOXBIN which not only eradicates the risk of rust but makes the units safe to use in MRI units.

✓ All Smooth Radius and Corners

No sharp edges or inside radius which can act as dirt traps helps reduce infection but makes cleaning quicker and simpler.

✓ Full Parts Back Up and ordering System

All parts down the smallest plastic screw are made in the U Group Ltd Factory. A full parts list can be provided and exploded drawings to make repair easy and cheap just in case a unit gets damaged.

✓ 3 Year Warranty

Gives you piece of mind that all parts will be replaced FOC in the event of a fault.

Unique Features

✓ One Piece Plastic Lid

Smooth Surface which is easy to clean with no hidden dirt traps and also allows for U GROUP Ltd Unique removable Vinyl labels to be used (info available)

✓ Removable Lid Caps

Can be swapped and changed to distinguish or change waste streams

✓ Easily Removable 'snap off' Coloured Lids

Different coloured lids can be quickly and easily replaced to change waste streams or usage or in the event of damage without the need for any tools

✓ Drip Tray Recess

A raised area enables the BOXBIN body to slot cleanly into a recessed area but also collects any unwanted spills from bags splitting.

✓ Fully Enclosed Smooth Foot Pedal

Smooth and flat pedal reduces and dirt build up and only protrudes as much as is necessary to make cleaning easier.

✓ Light Touch Foot Pedal Action

Light pedal action makes it easier for use in orthopaedic areas. The BOXBIN can even be easily opened with a walking stick

✓ Non Marking Rubber Feet

Small rubber feet under the BOXBIN prevent units sliding around when being used and further help protect expensive floor surfaces

✓ Smooth Enclosed Base

Fully enclosed underneath, The BOXBIN make even cleaning underneath the bin easy and prevents any damage to floors.

✓ Separate Lid Mechanism

The mechanism is not attached to the lid as with other products on the market which prevents strain on the lids and reduces damage through misuse.

✓ Soft Closing Lid

Soft closing lid reduces disturbance in the bins' surroundings

✓ Smooth Plastic Lid/Sack Retention Ring

Sack retention ring holds bags in position when closed and keeps the lid out of the way when emptying. Smooth radius also keeps cleaning quick and simple and reduces any dirt build up to help reduce any infection risk

✓ One Piece Removable Body

The BOXBIN body can be removed to help with emptying but more importantly make cleaning really simple and easy.

✓ Enclosed Lid Mechanism

All moving parts encased in a Robust spine to reduces cleaning time and keeps the units sturdy when the body is removed

✓ Plastic Wheels

Plastic wheels make the BOXBIN easy to manoeuvre from area to area and reduce marks on the floors.
