BS336 instantaneous fire hose couplings are the standard low pressure fire hose fitting for UK fire brigades and all fire related installations.

Construction: Material – light alloy

Applications: Suitable for fire applications
Industrial and general applications

Properties: Combined branchpipe & nozzle gives out a jet stream
Diffuser branchpipe goes from shut-off, to small jet, to large jet, to spray
Diffuser outlet works by turning the rubber tyred sleeve
2½in instantaneous male inlet fits to instantaneous female couplings
Instantaneous fittings conform to BS336

Maximum working pressure: 16 bar

Type	Working Pressure		Jet	Spray	Code
	(bar)	(psi)	(lpm)	(lpm)	
Combined	16	232	90	-	4512200
Diffuser	16	232	420	520	4512300

All pressure ratings quoted at ambient temperature
