

SEALED-BLOK™
WITH FAST-LINE™ SRL

FAST-LINE™ MEANS LIFETIME

**Saves Time,
Money and
Productivity**

THE ULTIMATE IN FALL PROTECTION

THE BENEFITS OF THE SEALED-BLOK™ WITH FAST-LINE™ SRL KEEP GETTING BETTER!

Owners of Sealed-Blok™ with FAST-Line™ SRLs with a date of manufacture after 4th January 2015 are no longer required to send their FAST-Line™ SRLs back to Capital Safety for recertification in the event of a fall or if the impact indicator has activated.

Some competitors require you to change the internal brake of their SRLs after a fall. But our Sealed-Blok™ with FAST-Line™ SRL uses a proven brake technology that does not require the brake to be replaced, adjusted nor checked after a fall.

Sealed-Blok™ with RSQ feature will still require to be sent to an Authorised Service Centre for RSQ servicing.

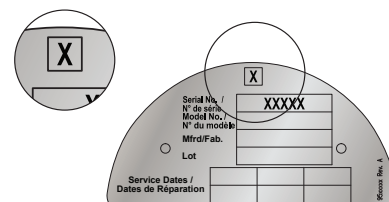

BENEFITS OF THIS NEW FEATURE INCLUDE:

- Reduce downtime with the quick FAST-Line™ replacement time
- Lower lifetime expenses and save money
 - Replacement cables are much less expensive than a brake mechanism
 - Shipping costs to have the SRL serviced are reduced or eliminated
- Maximise productivity

Customers who purchased Sealed-Bloks™ with FAST-Line™ prior to 4th January 2015 may have their SRLs certified for this program by an authorised Capital Safety service center for a one-time Level 2 Service Fee. It will then be given a new label indicating it can be serviced in the field.

TO COMPLY WITH THIS PROGRAM, FOLLOW THESE EASY STEPS:

1. Determine whether or not your Sealed-Blok™ SRL can be field serviced after a fall. Look for the box with a check mark on our new label signifying this capability.
2. Replace the cable and hook (the FAST-Line™) in the field in accordance with the IFU.

A. Pull entire length of cable out and activate lock to prevent rewinding.

B. Loosen original cable termination and remove lifeline assembly.

C. Insert new lifeline assembly and secure in place. Restrain lifeline, release lock and allow new lifeline to retract.

3. Complete inspection by a competent person in accordance with the IFU.
4. Return the Sealed-Blok™ with FAST-Line™ SRL to service.
