DATA SHEET

MODEL: 55H6221

Free standing trace heated emergency safety shower with additional eye, face and hand wash. The shower is fitted with a tough outer jacket surrounding pre-insulated metal pipe-work. Pulling the stainless steel handle, which opens a one-inch valve, operates the shower. The shower is fitted with a self-draining spray nozzle. The eye bath unit is constructed from corrosion resistant plastic. Features include operation by lifting the plastic lid which actuates the ½" valve giving constant water flow at 2.2 bar g and the lid also keeps the unit free from contamination when closed. There is full adjustment to the aerated water using the flow controller. Fitted to the side of the unit is a hand held diffuser on a flexible hose suitable for treating disabled or unconscious personnel. All units are fitted with a mirror for the operative to check that any contamination has been cleared from their eyes after flushing. The inner standpipe is heated using 10w/m trace tape fitted with an ambient air-sensing thermostat to prevent the water overheating, suitable for either Safe Area or Zone 1&2 classifications.

MATERIAL	DESIGN FEATURES						
2" internal pipe-work either galvanised or stainless steel	Strength against impact						
1" valve either brass or stainless steel.	75 l/min flow rate at 2.2 bar g						
1/2" valve either brass or stainless steel	30 l/min flow rate at 2.2 bar g						
Eye bath bowl and lid yellow plastic	Corrosion resistant						
1/2" inline brass Y-strainer with stainless steel mesh filter	Strength against impact						
Chrome plated aerators with mesh strainers	Corrosion resistant						
Polyethylene green outer jacket	Impact and corrosion resistant						
OPTIONS (Please indicate if required by marking the box next to the option)							
Platform operation to the shower							
Treadle operation to the eye and face wash							
Waste pipe to the floor from the eye and face wash							
Shower and eye wash sign with mounting bracket							
Unit voltage	110v	230v					
Indicator light	Safe Area	Zone 1&2					
Proximity switch	Safe Area	Zone 1&2
