

Fatigue-Step Edges Nitrile

Interlocking Bevelled Edges Nitrile

- The Fatigue-Step system is finished off with this series of ramped edges, which is meant to lessen the risk of trips.
- This edging is oil-resistant making it the ideal edging for environment where oil spills is a given.
- Because it is composed of durable rubber, Fatigue-Step can be used in a variety of conditions.
- Each edge piece perfectly interlocks with the tile system when Fatigue-Step is used as a loose-laid floor covering, making the edging a great design solution.
- To prevent tripping hazards, the edging is offered in a bright yellow colour.
- Wheeled traffic can easily cross the mat with the ramp shape edging.
- Edging is designed for simplicity and is easily clipped into the mat and one another.
- The Fatigue-Step, Solid Fatigue-Step, and Fatigue-Step Grit Top can all use the edging.

Parts

Part Number	Size	Colour	Weight (kg)
SS070002MN	75 mm x 1 m	Yellow	1.3
SS010002MN	75 mm x 1 m	Black	1
SS070002FN	75 mm x 1 m	Yellow	1
SS010002FN	75 mm x 1 m	Black	1
