

## Fatigue-Step Edges

### Interlocking Bevelled Edges

- This set of ramped edges completes the Fatigue-Step system and is intended to lower the danger of trips.
- Fatigue-Step is appropriate for a variety of settings because it is made from hardwearing rubber.
- When Fatigue-Step is utilised as a loose-laid floor covering, each edge piece precisely interlocks with the tile system, making the edging an excellent design choice.
- To reduce trip hazards, the edging is offered in a bright yellow colour.
- The ramped edge is designed to allow wheeled traffic to easily move over the mat.
- Edging can easily be clipped into each other and is made for convenience.
- The edging is suitable for the Fatigue-Step, Solid Fatigue step and Fatigue-Step Grit Top.

## Parts

Part Number	Size	Colour	Weight (kg)
SS070002M	75 mm x 1 m	Yellow	1.3
SS010002M	75 mm x 1 m	Black	1.3
SS070002F	75 mm x 1 m	Yellow	1
SS010002F	75 mm x 1 m	Black	1
