

STANDARD HOOD GORE-TEX PYRAD® STRETCH

WH240S/WH250S

PRODUCT DESCRIPTION

The ProGARM® WH240S/WH250S is a durably protective, arc-rated standard-size hood, engineered to deliver outstanding protection against the thermal hazards of an electric arc. Constructed using GORE-TEX PYRAD® Stretch technology, it offers exceptional comfort, flexibility, and breathability while remaining fully waterproof and windproof.

Designed for compatibility with the WJ240 and WJ250 jackets, this hood provides a secure fit and reliable protection for the head and neck in challenging environments. A choice of Hi-Vis Orange, or Hi-Vis Yellow/Navy two-tone design enhances visibility for increased wearer safety, making it an ideal choice for workers exposed to unpredictable weather and high-risk conditions.
